**Nadia Odorico  
Principal  
Griffith Hack**

Nadia was registered as a patent attorney in 1998 and in that same year, she was named the most outstanding candidate to complete the examinations by The Institute of Patent and Trade Mark Attorneys of Australia. In 2002 Nadia worked in England with a reputable patent attorney firm to broaden her skills. She has extensive experience working with patents and designs for both local and international clients.

Using her mechanical engineering background, Nadia has a special interest in the patenting of mechanical inventions. She drafts patents for a wide range of inventions including agricultural equipment, medical devices and materials handling equipment to engine components and other machinery.

“People often underestimate the value that patents, trade marks and design registrations can bring to their business. They are hidden assets. But I think the general public as well as businesses are becoming savvier when it comes to intellectual property,” says Nadia.
